40, approximately 2 miles south of the Jordanelle Dam, and extends south 1.6 miles connecting onto the existing transmission line on Highway 40 approximately 0.8 miles south of the Highway 40/32 Interchange. The transmission line extension begins again at approximately 950 North and Highway 40 and runs 1.6 miles west and south, following the planned bypass road corridor, to the intersection of approximately 1200 West and Highway 113. The rebuilt transmission line portion of this permit application follows the existing transmission line on 1200 West, It continues south for approximately 0.25 miles. A new line would then go west along the fenceline for approximately 700 feet. The line would then run from a proposed substation in the area of 1200 West 650 South and the rebuilt line would then run from that point to the West approximately 2.1 miles ending at Highway 113, then again from the County portion of Wards Lane and 600 West and run 0.5 miles north ending at the Midway Substation located west of the cemetery in Midway City. The Midway substation will be upgraded within the existing fence around the substation on the Applicants property. The structures and poles will range in height from 75-90' with dead end poles ranging in height from 90-110'.

All interested persons are invited to attend.

Notice of Special Accommodations:

In compliance with the Americans with Disabilities Act, individuals needing special accommodations during this meeting should notify Sherry Lawrence at 657-3205 at least one day prior to the meeting.

Notice of Electronic or telephone participation:

There is no electronic or telephonic participation available for this meeting.
